CREDIT CARDS HAVE BEEN WIDELY USED by self-service industries. Customers have shown that they spend more money with businesses that accept credit cards.

Rowe and USA Technologies have partnered to provide credit card acceptance in Rowe token dispensing machines. Using the MEI® Combo Acceptor and ePort Credit Card Clearing Service, self-service businesses can honor MasterCard®, VISA®, American Express®, and Discover® cards, as well as \$1, \$2, \$5, \$10 and \$20 bills. The PCI Compliant ePort system can be wireless or connected to a PC via an Ethernet connection. Customers are quickly and easily prompted through the transaction by using the a button while viewing the bright, 2-line, 16-character LCD display.

USA Technologies will quickly set up your merchant account. The low \$9.95 monthly service fee paid to USA Technologies will allow on-line access to your transaction records. In addition, there is a transaction fee as low as 2.55% per transaction depending upon the average transaction amount. Century, 6, 8, and 10 front load models can also be equipped with the MEI Combo bill and card acceptor or USA Technologies card Acceptor.
